### BEACHES, CREATURES & COWBOYS

Since the beginning of the movie industry, films have romanticized Florida's exotic scenery and remarkable flora and fauna. *Tarzan* swung through the Florida jungles, swimming champion *Esther Williams* frolicked on the beaches, and *The Creature from the Black Lagoon* lurked in the state's dark and mysterious springs. Crafty movie marketers designed colorful, eye-catching posters to draw people into these uniquely Florida films. As an independent art form, these posters are now woven into the Sunshine State's cultural tapestry. Throughout the months of June and July, **The Historical Society of Palm Beach** will honor this legacy by presenting an exhibition called *Beaches, Creatures and Cowboys: Florida Movie Posters*. The posters and lobby cards in this fascinating exhibit depict some of Florida's most famous films from the early 1920s to the present. See more at [hspbc.org/exhibitions](http://hspbc.org/exhibitions).

### DOCUMENTING LOCAL HISTORY

*The Kennedy Bunkers*, a documentary produced by **Mad V Studios** out of Pawtucket, RI, covers the complete history of properties created for the purpose of protecting **President John F. Kennedy** and a call to action for their revival as museums. As Director Michael Viveiros explained, "These properties remain as time capsules echoing an era of trials now foreign to today's generation." Viveiros recently hired local Palm Beach County crew to film the **Maritime Museum in West Palm Beach** and the property surrounding **The Kennedy Bunker on Peanut Island**, as well as an interview with **Port of Palm Beach** Executive Director Manuel Almira. "We were pleased to have the representative from the Port have a personal connection with the property," said Viveiros. Check out some of this unique local history and where to find artifacts by visiting the Maritime Museum website at [pbmm.info](http://pbmm.info).

You get that when you watch this program on PBC TV." said Lester Williams, PBC TV Channel 20 Station Manager. Tune into the first episode as host James Currie fishes off the coast to reel in a swordfish. ## BRIFT FINDS A NEW HOME

The **Burt Reynolds Institute for Film and Theater (BRIFT)** found its new home in **North Palm Beach**. Located in the Village Shoppes of North Palm Beach, BRIFT provides an intimate space for students to hone their acting, writing and filmmaking skills. The new space, which is only open when classes are in session or when a production is being mounted, also features a black box theater that showcases original material written by emerging playwrights. All stage productions are followed by a Q&A session where audience members are encouraged to share their thoughts. Managing Director Donna Carbone believes the feedback will help authors improve their work, noting that they “value input from a discerning audience.” Mr. Reynolds has taught classes at the Institute and is currently promoting his newest film *The Last Movie Star*. For more information on classes, visit [burtreynoldsinstitute.org](http://burtreynoldsinstitute.org).

## INSIDE A PHOTOGRAPHER'S WILD WORLD

Delray Beach resident **Laura C. Williams** has one of the most enviable jobs in the business as a world-renowned wildlife photographer. From magazines like *National Wildlife* to *National Geographic*, Williams' ability to capture everything from albatrosses to pumas has led to a lifestyle of travel and wonder with the click of a shutter. Still, Williams explained that the perception is not always reality when working with exotic wildlife. “Even after investing an incredible amount of time and energy, there's no guarantee of success. Wildlife photography subjects are rarely cooperative!” she said. In the midst of traveling the world for her profession, Williams fell in love with Delray during a visit in 2012 and made the beach her permanent home. Some of her recent work has now culminated into an exciting new book release, *Wildlife in Wild Lands*. Looking back on the start of her career, Williams shared, “The truth is, I never intended to become a professional photographer. I was simply doing what I love to do.” See more of her work online at [lcwphoto.com](http://lcwphoto.com).

## FROM PRO GOLFER TO EXEC PRODUCER

**Palm Beach County** resident and pro golfer **Rickie Fowler** is the Executive Producer for a new documentary series airing on the **Golf Channel**. *Driven* is a four-part series that gives viewers a thrilling behind-the-scenes look into the golf program at Fowler's alma mater, Oklahoma State University (OSU). The show captures part of OSU's 2017-18 season both on and off the golf course. **NBC Sports** is also showcasing *Driven* across its other networks, with encore presentations airing on **NBC Sports Network**. Meanwhile, the series finale is set to broadcast on **NBC** on Saturday, June 16.

Fowler decided to make The Palm Beaches his home shortly after turning pro in 2009. In addition to hitting the links, he is keen on water sports like fishing, paddle boarding and jet skiing. When asked about “must-do” things in The Palm Beaches, Fowler recommends dinner at **The Woods Jupiter** in **Harborside Place**. ## LOCATION SPOTLIGHT ANYWHERE, USA

The Film Commission often gets requests for locations that could be anywhere in the USA. Not the easiest thing to do in south Florida where the palm trees and tropical landscaping are hard to avoid. We have you covered with these options and more!

Abacoa Neighborhood

The neighborhood of **Abacoa** located in **Jupiter** is a perfect backdrop for residential driving scenes and small town America as well the look of "Anywhere, USA", offering some streets without any palm trees. The houses could be categorized as a

graceful southern style with batten board exteriors and welcoming porches. **Central Boulevard** in Jupiter offers long stretches of road that have live oaks that provide a nice canopy for driving scenes. If a dense landscape is required, **Tonney Penna Drive** offers a wide stretch of landscaping that is set back from the roadway which leaves a clear view of the sky for filming driving scenes with a Russian arm or a crane.

Established in the 1980s, the **Millpond** neighborhood has hills in **Boca Tierra Park** that help it convey an "Anywhere, USA" location. There are a few cabbage palms to avoid, but the wider paved walking trails make it a great option for a lifestyle backdrop for pushing strollers or a couple walking. Since it is one of the more established neighborhoods in the region, the mature trees cover the roadway and provide lots of shade to filter out the bright sun, allowing for a longer shooting day.

Boca Tierra Park

The Squire Course

For golfing sequences that do not have palm trees, **The Squire Course** at the **PGA National Resort and Spa** is a terrific option. The club will allow a complete buyout of the course so filming can be completely private. A large stand of cedar trees offers a bright green backdrop in the spring and summer, while offering a bit of fall color in September and October. Their meticulously maintained greens are an ideal backdrop for high-end golf products and celebrity endorsements. For more, visit [pbfilm.com](http://pbfilm.com).

## EDUCATION CORNER VISIONARIES CREATE NEW COLLEGE

A perfect match is made for aspiring filmmakers! **Keiser University** and **G-Star Studios** have joined to create the **College of Cinematic Arts Keiser University**. With classes to be held at G-Star Studios and Keiser's flagship campus, Palm Beach County continues to be propelled into the upper echelon of filmmaking education. "This degree brings a new dimension to the Keiser University, as it is the first 'arts oriented' program to be offered by the institution," commented **Dr. Arthur Keiser**, Co-Founder/Chancellor of Keiser University.

The curriculum's approach enables students to demonstrate their artistic expertise and application of business knowledge to enhance their career opportunities. Future filmmakers will be prepared to apply cinematic arts

skills and concepts, effectively communicate information using appropriate technologies, understand fundamentals of screen-writing, storytelling, structure, tension, suspense and more. "The faculty of G-Star will be able to share their professional expertise with a collegiate film-student population from across the nation," said **Greg Hauptner**, CEO of G-Star School of the Arts and G-Star Motion Picture Studios.

With the outstanding record of G-Star in providing quality film program graduates and educating future film industry personnel, the **Cinematic Arts Degree** makes for an excellent match with the career, technical, business and professional applications of the Keiser University programs of study. The college offers both **Associate of Arts** and **Bachelor of Arts** degrees in an integrated format that

Keiser & Hauptner

allows AA graduates to continue to earn their BA while employed at one of several industry-related positions. Plans call for the new degree to be available in the 2018-2019 academic year at the Flagship Campus of **Keiser University** in **West Palm Beach** and the **G-Star School of the Arts** in **Palm Springs**.
